information, see SolarWinds Orion Failover Engine. If you have installed a Hot Standby Engine, the default port is 80.€If you specify any port other than 80, you must include that port in the URL used to access the web console. For example, if you specify an IP address of 192.168.0.3 and port 8080, the URL used to access the web console is h

The SolarWinds Orion network management products leverage SNMP for gathering availability and performance data, and SSH (Telnet or TFTP) for executing configuration management operations across your network devices. Orion requires a Windows Server with the following minimum specifications:

SolarWinds NPM was designed to provide out-of-the-box multi-vendor device support for today's complex network environments. SolarWinds NPM monitors availability and performance statistics for any routers, switches, firewall, VPN concentrator, wireless access point and more that support standard protocols.
